**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gordon R. Lindeen III on 9/7/2007.

The application has been amended as follows:

Claim 37 line 1, "A machine-readable medium having stored thereon instructions that when executed by a controller cause the control" is changed to –An apparatus comprising a processor and a storage medium having stored thereon instructions that when executed by the processor cause the processor--.

***Allowable Subject Matter***

2. Claims 1, 6-9, 12-14, 16, 17, 25-30 and 31-41 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach the following:

In regards to claims 1, 25, 31 and 37 the prior art does not teach control command including a first mobility management attribute-value pair(s) (AVP) indicating whether a call is a new call or a handover to facilitate exchange of mobility information

in the data network, the control command including a second AVP indicating a cookie-based session identifier and a third AVP indicating a security module-generated session identifier to facilitate secure mobility of wireless communication sessions.

The prior art alone or in combination fails to jointly suggest or teach the claimed combination of features as taught by the instant application. Therefore claims 1, 6-9, 12-14, 16, 17, 25-30 and 31-41 are to be deemed allowable over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
